Convergence Concepts

Part I – Statistics Foundation for ML

Omid Safarzadeh

This chapter isn't written yet

The written-out chapter is still to come. In the meantime the original lecture slides are in the `source_slides/` folder next to this file, and you can work from them today. The topics they cover are listed below.

Slides: `source_slides/STAT4ML_Slide_5__Convergence_in_Probability.pdf`*, exactly as taught.*

Planned topics

- Random samples
- Sums of random variables from a random sample
- Inequalities
- Almost sure convergence
- Convergence in probability
- Convergence in distribution
- The delta method
