Regression, Cross-Validation

Part II – Introduction to Statistical Learning

Omid Safarzadeh

This chapter isn't written yet

The written-out chapter is still to come. In the meantime the original lecture slides are in the `source_slides/` folder next to this file, and you can work from them today. The topics they cover are listed below.

Slides: ***`source_slides/Chapter_2__Cross_Validation.pdf`****, exactly as taught.*

Note: the slide deck above is titled 'Cross_Validation'; this chapter also covers the regression material that goes with it.

Planned topics

- Regression
- The least squares approach
- Multiple linear regression
- Bias-variance tradeoff
- Validation
- Leave-one-out cross-validation
- k-fold cross-validation
