Transformers

Part II – Introduction to Statistical Learning

Omid Safarzadeh

This chapter isn't written yet

The written-out chapter is still to come. In the meantime the original lecture slides are in the `source_slides/` folder next to this file, and you can work from them today. The topics they cover are listed below.

Slides: `source_slides/Chapter_11__Transformers.pdf`*, exactly as taught.*

Note: the slide deck above is named 'Chapter_11' – that is the original course's numbering, which drifted from the topic order used here.

Planned topics

- Sequence-to-sequence models
- Attention mechanism & the bottleneck problem
- Categories of attention
- Self-attention
- Multi-head attention
- Encoder / decoder architecture
- Positional encoding
