Automatic Feature Extraction

Part III – Advanced Statistical Learning for DL (to be announced)

Omid Safarzadeh

This chapter isn't written yet

The written-out chapter is still to come. In the meantime the original lecture slides are in the `source_slides/` folder next to this file, and you can work from them today. The topics they cover are listed below.

Slides: `source_slides/Chapter_12__Automatic_Feature_Extraction.pdf`*, exactly as taught.*

Planned topics

- Motivation
- Automatic feature engineering with TensorFlow
- Deep & Cross Network structure
- Preprocessing
- Cross network
- Deep & Cross Network v1 / v2
- Model construction
- Interpreting cross features
- Model performance
