Automatic Differentiation

Part III – Advanced Statistical Learning for DL (to be announced)

Omid Safarzadeh

Status: STUB

This chapter has not been fully authored yet. It is scaffolded so the folder/file layout matches every other chapter in the repo. See `README.md` in this folder for how to contribute a full chapter.

No original slide deck exists for this chapter yet – see AUDIT.md / ROADMAP.md.

Editorial note: No source PDF exists yet – this whole part is pre-course scaffolding.

Planned topics

- *TODO: topic list*

TODO

- Expand each topic above into full prose sections with worked examples.
- Add figures under `figures/`.
- Fill in `exercises/python`, `exercises/r`, `exercises/rust` (plain exercise, Rustlings-style buggy exercise, and solution) per the pattern in Chapter 1/2 of Part I.
